

Operation of Beverage Insulator

1. Wash & rinse the unit prior to its use.
2. Pre-heating interior with hot water will improve heat retention
3. Pre-chilling entire unit will improve cold retention
4. Load container to its maximum capacity. Make sure gasket is in place.
Replace lid and lock in position.

Care & Cleaning of Insulator

1. Clean after every use with hot water and soap. Be sure to remove gasket when cleaning. Be sure unit is completely dry before closing tightly. This unit can be run through a commercial dishwasher if it fits, but be sure to remove gasket to run through separately and be sure that latches will not get caught in the conveyor.
2. To remove odor, soak interior with baking soda and water.
