

Chafing Dish

USING A CHAFER:

Place one to two inches of hot water in water pan of chafier before serving. Sternos are not meant to heat water but to keep it hot.

Please be sure water does not burn off (and enough has been put in) as it burns the bottom of the water pan. Thank you.

How to Clean

- Discard used Sterno/fuel cups.
- Remove pan and water bath from unit.
- Wash pans thoroughly with terry cloth and hot, soapy water, paying special attention to underside rim and edges.
- Wash frame with hot soapy water, paying special attention to drips in crevices and at lid point-of-pivot.
- Make certain to close unit and wipe top of lid.
- Dry pieces immediately after washing and place entire unit back into crate.

How NOT to Clean

- Do NOT use scrub brush on anything but food pans.
- Do NOT use anything but terry cloth on frame.
- You do NOT need to disassemble the Sterno holder cup, or clean the flame residue from underside of unit.
